

NATURE EXPLORERS

Fall 2020

- October 1 ARTHROPODS: SPIDERS: We will compare the anatomy of spiders to insects, learn some cool facts about spiders, meet Rosie the Tarantula and go on a spider hunt.
OR
October 8
\$4
- October 15 THORNS AND THREATS: We will explore the pain-producing strategic defenses that plants and animals have developed to keep them from being eaten.
OR
October 22
\$4
- October 29 ANIMAL ENGINEERS: After we learn how some animals construct shelters, we'll see how many examples we can find at Sarett.
OR
November 5
\$4
- November 12 NATURE PREPARES FOR WINTER: Animals prepare for this harsh season by staying put, sleeping or getting away. We'll study the survival strategies of hibernation and migration and the behaviors of animals that stay active.
