

Spring 2022
NATURE SCHOLAR CLASSES
Wednesdays 2:30-4:00

Program cost

Members: \$8

Non-Members: \$12

January 5,12 Minerals

Minerals are the building blocks of all rocks, composed of naturally occurring elements. Learn how to identify these minerals and sort them based on their physical properties.

February 2,9 Rocks

We will take minerals a step further by exploring the rock cycle and delving deeper into how sedimentary, igneous, and metamorphic rocks are made and how to identify them.

March 2,9 Maple Sugaring

As the trees thaw out in early spring, the sap starts to flow, which makes it the perfect time to collect for maple sugaring. Discover the inner workings of the trees to learn about the different ways to gather and process maple sugar into the fun sweets and syrup we like to enjoy.

April 6,13 Frogs

Michigan's frogs are just starting to come out and call for the season. Take some time to learn about the 12 different frog/toad species in Michigan, their life cycles, what they have been doing all winter long and what they will be up to this summer!

May 4,11 Salamanders

Salamanders are a very important group of amphibians although not seen as often as their frog/toad cousins. Learn about Michigan's 10 salamander species, their special adaptations, and where to find them.
