

Sarett Nature Center

Nature Scholars

The Nature Scholars program is a series of natural science classes designed to supplement homeschool programming. It is broken down into two learning groups, ages 5-8 and 9+. The younger students will have environmental topic based story time, hikes, and activities while the older students will have more in-depth studies and exercises. In addition to our activities, we also provide a *Parent Page*, an outline of the day's presentation for review and/or portfolio use.

Programs will be held the second Wednesday of each month, starting at 2:00 PM. Both age groups will be held simultaneously for ease of family groups. Bookworms are more than welcome to enjoy the nature center after their program has finished while waiting for the Sages. Please be prepared for the weather as we will be going outside for almost every class.
